

3D VIRTUAL TOURS & FLOOR PLANS

3D VIRTUAL TOURS

Asset Reports is equipped with Matterport 3D cameras to produce stunning, high-definition interactive virtual tours of residential or commercial properties for sale or lease.

These virtual tours allow viewers to experience the feeling of being in a property without having to physically be present, which is ideal for absent owners, or couples where only one party can attend a home-open.

The tour can be shared on social media and embedded into listings on real estate websites. [Domain.com.au](https://www.domain.com.au) reports that users spend **52% longer** on listings that contain a Virtual Tour, and listings with tours receive **80% more enquiries**.
